

PhD student positions/City University of New York

PhD student positions are available at the Doctorate-Granting Institution of the City University of New York for the Doctoral Program in the Earth and Environmental Sciences. The on-line applications is at: http://www.gc.cuny.edu/admin_offices/admissions/index.htm

Information for International Students is available at: http://www.gc.cuny.edu/admin_offices/admissions/intl_app.htm

Please submit a complete application (application, statement of purpose, transcripts, letters of recommendation, GREs, TOEFL) by January 15, 2009 to allow us time to consider your application for admission and financial aid for Fall 2009.

The EES Program offers attractive multi-year financial aid packages to strong candidates. These five-year packages typically include full tuition, fellowship support of up to \$24,000 / year, and highly subsidized health insurance. Teaching duties may be required beginning in the second year.

The research conducted in my Lab is in the area of micrometeorology and atmosphere-biosphere interactions. Students with background in one of

following: (1) mathematical physics (theoretically modeling turbulent flows); (2) numerical simulation (simulating canopy flows over complex terrain); (3) data analysis (eddy flux data analysis); and (4) instrumentation (eddy flux measurements), are encouraged to apply. Applicants who have published journal papers are absolutely more than welcome to apply.

Please contact to Professor Yehuda Klein (YKlein@qc.cuny.edu, 212-817-8240) for information on the EES Program; contact to Professor Chuixiang Yi (cyi@qc.cuny.edu, 718-997-3366) for research directions.
